

PETER LEE

Lacey, WA · leepeter019@gmail.com · 360-888-7530 · peterlee.io

SKILLS

Front-end: React, Redux, Javascript, CSS3, HTML5, Bootstrap
Back-end: Node, Express, Ruby on Rails
Database: MongoDB, PostGRES, Neo4j
Other: Git, Webpack, NPM, AWS Amplify, S3

PROJECTS

Chat App

<https://www.chatapp.site>

A real time chat application with social networking capabilities.

- Developed and maintained a web-socket API using Node and MongoDB
- Designed a responsive front-end user interface that handles real-time data updates and user interactions with carefully planned state management
- Designed database schemas to efficiently query and store user information including a version utilizing graph databases to elegantly model friendships

E-commerce

<https://young-savannah-92584.herokuapp.com>

A skeleton for an online store.

- Built a RESTful API backend with token based authentication and routes to accept real payments through Stripe API
- Integrated Google maps API to autofill forms and enhance user experience
- Implemented a back-end user interface to enable admins to monitor orders and update product information

Able Moving

<https://dry-brushlands-51041.herokuapp.com>

A website for a local moving company.

- Designed and developed a modern website with React and Redux
- Incorporated a way for users to receive instant quote estimations based on location and size of move
- Introduced a component that displays real time information about hours of operation

peterlee.io

<https://www.peterlee.io>

A personal portfolio where more projects are displayed.

- Built and maintained a single page responsive application using React and Redux, focused on clean layout and aesthetically pleasing front-end design
- Included a back-end UI to easily add and update projects and view personal messages
