SUMMARY

Recent graduate of The Odin Project with experience creating full stack web applications. Currently in the process of transitioning into a career in technology. Strong desire to enter the world of Software Development. Strong and creative problem solver, fast learner and diligent worker. Dependable and reliable while working under stressful conditions.

PROJECTS

Social Media Site

A social media site designed to have similar functionality to facebook. While working on this project I gained a strong understanding of the MVC design pattern and relational databases.

Chat App

A single-page web chatting application where users can add friends and send messages. Gained experience working with web sockets and graph databases.
