## PROJECTS

### ECOMMERCE (Sole developer/designer) [Live Site](#)

A fully functional online store developed with React. Features payments with Stripe API and a backend user interface for site admins to update products and view orders.

### CHATAPP (Sole developer/designer) [Live Site](#)

A chat platform with persistent messaging and social networking capabilities. Utilizes a Neo4j graph database to model friendships and the Socket.IO library for real time updates.

### KENTICO (Open-source contribution) [Live Site](#)

Added an alphabetical sort component to improve the user interface. Gained experience using version control in a professional setting and consuming new codebases.

## EDUCATION
